

SHIVANSHI KAPOOR

📍 Indore, India | 📞 +91 6232086290 | ✉️ kapoorshivanshi10@gmail.com | 🔗 [LinkedIn](#) | 🌐 [GitHub](#)

Frontend & Full Stack Developer with experience building scalable React.js applications, reusable UI components, and performance-optimized web solutions. Skilled in React.js, TypeScript, JavaScript, REST APIs, Playwright, and the MERN stack.

WORK EXPERIENCE

Associate Software Engineer | Kavach Data Privacy Services

Jan 2026 – Mar 2026 | Remote

Tech: React.js, TypeScript, Playwright, REST APIs, JWT

- **Engineered** reusable React.js + TypeScript components that improved frontend performance by **30%**, reducing rendering overhead and increasing application responsiveness.
- Built responsive DPDP-compliant consent workflows, enhancing security and user experience.
- Achieved **85%+** Playwright test coverage, reducing manual testing by **60%** and production bugs by **40%**.
- Developed reusable UI components and integrated REST APIs with JWT authentication to deliver secure, scalable frontend functionality.

Software Engineering Virtual Experience | J.P. Morgan Chase (Forage) 🔗

Nov 2025 – Jan 2026 | Remote

Tech: Java, Spring Boot, Apache Kafka, REST APIs, JPA

- Built an event-driven transaction processing system using Kafka and Spring Boot.
- Designed REST APIs for secure transaction validation and persistence.
- Improved backend reliability through fault-tolerant architecture and integration testing

PROJECTS

MyMento – Scalable Mental Wellness Platform (MERN + Socket.io) 🔗

Jan 2026 – Mar 2026

- Developed a scalable MERN platform featuring **5+** core modules, real-time messaging, secure authentication, and appointment management.
- Reduced scheduling conflicts by **90%** through intelligent appointment validation.
- Increased user engagement by **40%** and retention by **35%** using analytics and real-time notifications.
- Implemented JWT authentication, RBAC, and OTP recovery for secure access.

Smart Grid Energy Optimizer (ML + Web App) 🔗

Oct 2025 – Dec 2025

- Built an ML-powered web application using **1,500+** records and **12** features.
- Achieved **92%** prediction accuracy for electricity usage forecasting.
- Generated recommendations capable of reducing electricity costs by **15–30%**.

Virtual CA – AI Financial Advisor (In Progress) 🔗

Mar 2026 – present

- **Building** an AI-powered financial advisory platform using the MERN stack and LLMs to automate tax planning and personalized financial recommendations.
- **Designing** secure REST APIs and authentication mechanisms for financial data management.

TECHNICAL SKILLS

Frontend : React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Bootstrap, Material UI

Backend : Node.js, Express.js, REST APIs, JWT Authentication

Testing : Playwright, API Testing, Unit Testing

Database : MongoDB, MySQL

Tools : Git, GitHub, Postman, Render, Linux

EDUCATION

Shri G.S. Institute of Technology and Science | Master of Computer Applications

2024 – 2026 | Indore, MP

CGPA: 9.00

Poonam Chand Gupta Vocational College(DAVV) | Bachelor of Computer Applications

2021 – 2024 | Khandwa, MP

CGPA: 9.03
